

Superbase®

Concentrate on profits

Building on over 100 years of experience, Essential Industries developed Superbase®, a unique manufacturing system to meet your customers' cleaning maintenance needs and increase your profits.

Superbase® enables you to easily blend premium performance floor care finishes, sealers, strippers, cleaners, and other sanitary supply products. Use ordinary tap water with Superbase pre-measured concentrates and manufacture the products your customers want.

Discover how you can concentrate on profits when you use the Superbase® system...

Increased Profits

- Our concentrates reduce cost by eliminating water from the formulation.
- Reduced freight bills - no need to ship water.
- Margins increase - you manufacture products using existing resources and overhead.

Product Flexibility

- Create your own "unique" chemicals to address customer needs by varying solids, actives, color, dilution and fragrance.
- Blending formulations and yield information are easy to use.
- Margins increase - a single source for all products.

Reduce Inventory

- Less storage space is needed.
- Margins increase - you manufacture based on customer orders.
